ADVENTURER X

PRODUCT CATALOG 2023

LIGHTING . WET LENS . ARM SYSTEM

Illuminate darkness with vibrant color when you add a video light. Video Light is the single most important underwater imaging feature next to your camera.

With X-ADVENTURER's Video Lights, you'll get the brightness, color rendering, temperature, and beam angle to produce amazing magazine quality stills and brilliant underwater video.

Natural Sun-Like Light

The video lights uses a high color rendering index flat panel COB LED array that closely mimics natural sunlight, to solves the issue of color-lacking underwater photos and videos by giving divers the ability to add natural sun-like light.
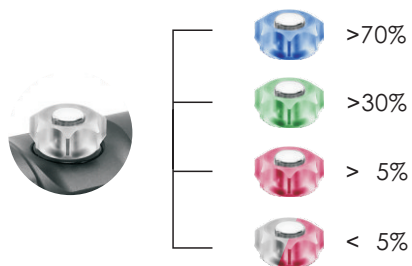

Easy to use

Dial Control Knob with push-button design allow easy operation with one hand.

Press the button to switch modes
Rotate knob to adjust brightness

Battery level indicator

Colored Status LED for battery and mode indication for easy power management

>70%

>30%

> 5%

< 5%

Auto-Shut-Off mode

Turns the light off for 0.5 second when an external flash is detected. This assures a well lit photo and prevents shadows in your images.

Model: M1000-WRA, M2500-WSRBA, M3000-WRUA, RL3000
M3000-WRUA II, M6000-WRBT II, M8000, M15000 II

Strobe Flash mode

The light is synced from a camera flash via a fibre optic cable and is fast enough to give a powerful pulse of light even for reasonably fast shutter speeds.

Model: M3000-WRUA II, RL3000, M6000-WRBT II, M8000, M15000 II

Turbo mode

The light brightness increased and burn time reduced .

Model: M8000

*Ambient Light Filter (Optional Accessories)

Converts the light into same spectrum as the ambient light under water. This is the perfect solution to avoid mixed light condition when you white balance the camera to ambient light.

Without Ambient Light Filter   **With Ambient Light Filter**

RC-02 Controller (Optional Accessories)

The RC-02 is a small controller for the video light, allowing you to adjust two lights at the same time or separate control. Put control of the video lights within thumb's reach. The controller unit can be mounted to the handle systems of your housing or the handles on your tray and arm system.

The RC-02 built-in a senser, support sets the video light brightness automatically based on ambient brightness.

Support: M2600-WRUA, M2800-WSRU, M3000-WRUA, M3800-WSRU,
M3000-WRUA II, M3500-WSRU, M5000-WSRU, M6000-WRBT,
M6000-WRBT II, M8000, M10000, M15000

Optical Snoot (Optional Accessories)

X-ADVENTURER's optical snoot system is a great tool for underwater photographers. video light snoots provide creative lighting possibilities to create outstanding black background macro snoot photography.

M1500-WRA
Smart Focus Photo Light

With 1500 lumens wide light and 200 lumens red light, in addition to the Auto-Shut-Off function, this compact video light is an ideal focus light which helps you to focus your perfect shot easily.

M2500-WSRBA
Smart Focus Dive/Photo Light

With 2500 lumens wide light, 300 lumens snoot light, 200 lumens red light & 6W blue light, Support Auto-Shut-Off function, this video light is an ideal dive light or photo focus light.

RL3000 RPO
Smart Focus Ring Flash Light

Rl3000 PRO ring light gives you 1800 lumens white light (3000 lumens in strobe flash mode), also with 100 lumens red light. The light added dimming left & right white light dimming separately function, optimized shooting effect, perfect for super macro images and videos.

T1800
Tech Dive Primary Light

With 1800 lumens spot light, 6 hours burn time is the best choice for tech diving.

T1800S
Side Mount Primary Light

With 1800 lumens spot light, 6 hours burn time is the best choice for side mount tech diving.

TF1800
Tech Dive Primary Light

With 1800 lumens spot light and 5000 lumens flood light, 6 hours burn time, button control design allow easy operation with one hand.

TF1800S
Side Mount Primary Light

With 1800 lumens spot beam and 5000 lumens flood light, 6 hours burn time, button control design allow easy operation with one hand.

WET WIDE LENS

UWL serial is the highest quality changeable ultra wide angle wet lens, featuring unmatched contrast, overall sharpness, corner sharpness, and clarity. The design is truly full zoom through, allowing zoom to be used as a tool for framing, and removable in water for wide angle shots.

UWL90-M52 Compact
Standard Wide Angle Wet Lens

The lens compatible with most current popular compact cameras, including OLYMPUS Tg4/5/6. It has standard M52 screw interface, can be installed directly on Olympus original housing. The lens focal length perfect support Olympus Tg4/5/6 camera, no need to adjust camera focal length to get a ultra wide angle image(no dark corner or visible vignetting).

UWL90-M67 Compact
Standard Wide Angle Wet Lens

The lens compatible with most current popular compact cameras, including Sony Rx100 series, Canon G7x series, OLYMPUS EM series. The lens focal length perfect support the camera, no need to adjust camera focal length to get a ultra wide angle image (no dark corner or visible vignetting).

UWL150-M52
Ultra Wide Angle Wet Lens

The UWL150-M52 ultra wide angle wet lens was designed with the Olympus TG series Tg4/5/6 cameras in mind. It has standard M52 screw interface, can be installed directly on Olympus original housing. With a 150° angle of coverage, sharp corners, and no vignetting at 24mm this lens is the perfect combination for the first time wide angle shooter with a TG camera.

UWL150-M67
Ultra Wide Angle Wet Lens

UWL150-M67 is a underwater ultra wide angle wetlenses, featuring unmatched contrast , overall sharpness, corner sharpness and clarity. It offers 150 degrees field of view with 24mm lens and M67 mounting type. The lens is perfectly work for SONY Rx100 series and CANON G7X series camera.
